Fact sheet

Slitter rewinder KAMPF 650 Universal

- system surface winder, can also be used as non-surface (non-contact winder (depends on material and needed web tension))
- used / modernized in year 2000
- modified electrical control equipment with PLC Siemens S7
- modified winding drives with CT controller Commander SE, both individually adjustable
- rotating direction reversal for winding drives
- working width 650 mm with web guide system, 700 mm without web guide system
- BST web guide control system, pneumatic detection

- max. rewinding diameter 500mm
2 pcs rewinder shafts 3"
- max. unwinding diameter 1000mm
1 pc unwinding shaft 3"
- pneumatically controlled unwinder brake
- slitting system; circular knife (available 3 pcs)

- meter counter Hengstler
- main drive electrically adjustable
- machine speed 150 m/min (200 m/min)
- indication of winding tension in %

- software file for Siemens SPS S7 available
- parameter file for drive controller available
- electrical supply 3 x 400VAC / 25A / 3P+N+GND

- compressed air 6 bar
- usable for paper, film, aluminum etc.
- needed space at least 4 x 3 m
- machine can be tested before shipment

- sold as is

- Packaging: not included

- Delivery: EXW Switzerland CH-9008 St. Gallen
